## EXPERIENCE

### Front-end Developer
📅 **Aug 2021 - May 2022**

Treeleaf Technologies | Nepal

- Make a Ticketing System like JIRA where the developers are assigned tasks and they can start a sprint and DRAG and DROP the tickets assigned to Done, Doing, or Completed.
- Make a chat system where people can send real-time messages. emojis, pictures and can mention people on the team.
- Use draft js to implement typing text editor for the chat system used for messaging.
- Implement a one-time calendar feature where people can assign meetings to each other.
- Implement / Code UI designs provided by the UI/UX team.

### React Js Developer
📅 **Jan 2021 - Jul 2021**

Bhawa Incorporation | Nepal

- Was solely responsible for developing the Web side product of our internal project where people can easily find suitable routes to their favorite trekking destinations.
- Communicate effectively with UI/UX developer and backend developer regarding the day-to-day task and future plans.
- Maintain and re-factor the code base weekly to maintain the project's standard.
- Research new libraries/packages to use on the product to make the work more up to standards.
- Make proper documentation of the work done regarding crucial project-based decision-making.
- improved the performance by migrating to Next Js platform.

### Junior React JS Developer (Remote)
📅 **Mar 2020 - Dec 2020**

Fizure (Planyard) | Switzerland

- Worked with the international team to collaborate on building a system where different construction companies could bid for a tender to build landmarks and buildings.
- Make in-house custom UI components for (Fizure UI) so we can use them across our multiple projects.
- Consume API and design pages with respect to the task assigned.
- Responsible for refactoring codes and learning from the senior management.
- Improved the performance of the project where large amount of dataset had to be rendered in a table using virtualisation.
- Responsible for UI design on in-house projects and also SEO performance.

### Quality Checker
📅 **Aug 2019 - Jan 2020**

Tulips Technology | Nepal

- Worked as a QA on a product that was helping people find construction materials to build houses. (selling raw materials needed to build such as bricks, large rods, and types of cement.)
- Check the details of the given supplier and their products to make entries in the system.
- Update any information regarding the products or the 1000+ suppliers.
- Was responsible for maintaining the site and mobile app in 2 languages (Nepali and English).
- Was responsible for finding faults and bugs in the dev server and live deployments (web + app).

### Supervisor
📅 **Jan 2019 - Jun 2019**

Cloud Factory | Nepal

- Supervised 5 people in my team so that the deadline target was met.
- Trained more than 10 people on existing techniques and technologies so that they can output results quickly.
- Responsible for handling the delivery of projects.
- Checked the quality of the product before submission and made necessary changes if needed.
- Worked with international teams to collaborate on the task assigned.

**Intern**                                                                    📅 **Apr 2017 - Aug 2017**

Crossover Nepal | Nepal

- Studying & testing the in-house product used to maintain inventory of certain stores and warehouses.
- Making design changes in the product tailored to the user's need.
- Managing proper documentation of the product to help the end-user on how to use the software.
- Maintaining coherence among the test builds.
- Help set up the product and the necessary resources to make the end user start using the applications.
- Find out bugs in the application by rigorous testing and report it to the development team.
